CAREER GOAL

Electronics and Communications Engineer with knowledge of CCNA and training in RF, fiber optics, and communication systems, complemented by practical experience in the design and validation of electronic systems. I am looking to begin my professional career in the field of networking, IT, and telecommunications, bringing a solid technical foundation, problem-solving skills, and a willingness to learn quickly.

PROFESSIONAL EXPERIENCE

Research Associate - CubeSat Testing Laboratory

Oct 2023 - Ago 2024

In charge for the design and development of validation equipment for CubeSat systems, including vibration testing, magnetic characterization, and attitude control.

- Designed PCBs and power regulation/distribution circuits for CubeSat validation subsystems.
- Developed test equipment for vibration, magnetic characterization, and attitude control systems.

Research Assistant - Isoceramic Map of the Dominican Republic

Jun 2024 - Sep 2025

In charge of developing electronic subsystems for the national project to map isoceramic lightning strikes.

- Designed schematics and PCBs (1- and 2-layer) for lightning detection subsystems.
- Performed circuit simulations in LTspice and developed power supplies for the detection systems.
- Contributed to the country's first nationwide isoceratic mapping.

EDUCATION

Electronics and Communications Engineer - APEC University

Jan 2021 - May 2026

Cisco CCNA 200-301 - Preparation Course Udemy

Apr 2026 - Aug 2026

SKILLS

- **Networks and Telecommunications:** CCNA 200-301, RF, microwaves, fiber optics.
- **Hardware Design:** Embedded systems, PCB design/manufacturing/validation (KiCad).
- **Software and Simulation:** Link Planner, LTspice, MATLAB, Fusion 360 (3D CAD).
- **General:** Linux/Unix, Microsoft Office.
